- Same search property page for home.. & brooker
  Profile page: navigation bar with menu of what page user have access to
- Page: can be similar for different user but some difference in component added
- Sprint 3: add as favorite page different for home..& broker

- Sprint 2: **request a visit** for now it's a component form that is added to property page of Dominique
  - Junior crée component et communique avec Dominique pour le rajouter à son property page
  - Junior crée component en suivant "your details" of mockup avec bouton noir seulement
  - Bouton noir permet d'envoyer un email
  - User story, acceptance test issues -> Update issue #72 to show that it's a component form and not a page
  - Task issues: created by junior and Dominique for task in task breakdown in user story issue that can be found here (https://github.com/Broke-Brokers/Broke_BRokers-soen341projectF2023/discussions/108) following this nomenclature

  - Isabelle: tests for pipeline (devops)

- **Search a property**
  - Taylor do user interface according to mock up search page
  - Taylor & Dominique uses Dominique's house card component to use it in Grid layout: https://devexpress.github.io/devextreme-reactive/react/grid/docs/guides/searching/
  - Rebecca/isabelle link database
  - Isabelle test for pipeline (devops)
  - User story, acceptance test issues -> isabelle & Dominique do task breakdown in user story issue
  - Task issue-> Taylor creates issues following task breakdown in user story found here (https://github.com/Broke-Brokers/Broke_BRokers-soen341projectF2023/discussions/108)

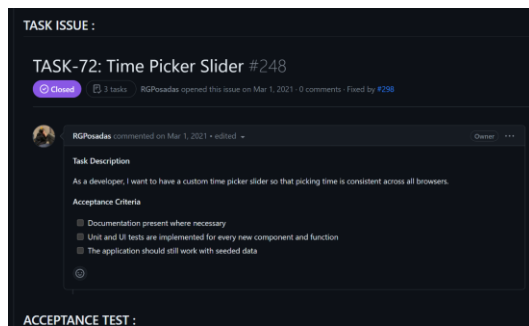

- **CRUD ON PROPERTIES**
  - Profile page for broker
  - Mockup isabelle d'ici 22 octobre
  - Junior do user interface page following mockup
    - Create: + button in broker profile page
    - Read: Junior uses Grid Layout to show properties created by broker log in
      : Taylor & Dominique, properties can be read in search page as well
      : https://devexpress.github.io/devextreme-reactive/react/grid/docs/guides/searching/
    - Update, delete: Rebecca linked to database to update & delete & can also uses this:
      https://www.pluralsight.com/guides/load-an-existing-database-record-to-a-react.js-form
  - Isabelle test for pipeline (Devops)
  - User story, acceptance test issues -> isabelle & Dominique do task breakdown in user story issue
  - Task issue-> Junior creates issues following task breakdown in user story found here
    (https://github.com/Broke-Brokers/Broke_BRokers-soen341projectF2023/discussions/108)

- **CRUD ON BROKERS**
  - Profile page for admin
  - Create and populate database for admin
  - Mockup isabelle d'ici 22 octobre
  - Populate database of brokers isabelle
  - Taylor do user interface page following mockup
    - Create: + button in broker profile page
    - Read: Taylor uses Grid Layout to show information about all broker
      - : https://devexpress.github.io/devextreme-reactive/react/grid/docs/guides/searching/
    - Update, delete: Rebecca linked to database to update & delete & can also uses this: https://www.pluralsight.com/guides/load-an-existing-database-record-to-a-react.js-form
  - Isabelle test for pipeline (devops)
  - User story, acceptance test issues -> isabelle & Dominique do task breakdown in user story issue
  - Task issue-> Taylor creates issues following task breakdown in user story found here (https://github.com/Broke-Brokers/Broke_BRokers-soen341projectF2023/discussions/108

- **Things not done but don't think need to for sprint 2:**
  - **Create and populate database for home owner/renter**
  - **In database show if home owner/renter is associated with a broker so that he can send property to client and send request for him**
